

HALL 3

Second largest hall of the EXPO XXI Warszawa venue. It comprises a multifunctional hall, outbuilding with toilet facilities and auxiliary spaces.

Hall 3 - floorplan

HALL 3 specification:

usable length - **75 m**

usable width - **48 m**

usable height - **8 m**

usable area - **3 600 m²**

total load-bearing capacity of the roof structure for hanging **7 tons**

Upon permission, up to **11 m** of the hall space height can be used in certain spots.

The hall 3 has three evenly distributed gates.

Gates dimensions:

width - **4,6 m**

height - **4,3 m**

Capacity:

Maximum number of occupants - **3 600** people, depending on the type of event and decorations as well as equipment in use.

The load capacity of the floor is **3 000 kg / m²**. The load can be increased by laying additional support elements on the floor. The hall floor is covered with increased durability tiles, no additional floor covering is required during events.

The hall has a system of evenly distributed utility channels parallel to its longer side. The utility channels are used to distribute the electrical installation and utilities.

Channels are equipped with:

- electrical installation,
- water and sewerage system,
- telephone and Internet installation.

Additionally, channels can be equipped with compressed air supply or a temporary control installation for lighting, sound or other systems.

Depending on the type of event, hall can be lit by daylight (skylights in the roof surface area and dormer windows in the hall walls) or completely darkened.

Elements of decoration, lighting or advertising can be suspended on the hall's roof structure.

Detailed instructions, specifying the suspension points and their load-bearing capacity are available on request from the EXPO XXI Warszawa Technical Department.
