

HALL 4

A new hall with area of almost 3 600 m² is located on the corner of the Pradzynskiego and Bema Streets in the Wola district, next to the existing EXPO XXI Warszawa venue.

The new hall consists of a multifunctional hall, two separate, glazed entrance halls, conference rooms, two toilet facilities, and auxiliary spaces. The hall is equipped with a 10 m high movable conference wall, allowing to host separate events at the same time.

Hall 4 - floorplan

Hall can be divided by a movable conference wall.

HALL 4 specification:

usable length - **93,5 m**

usable width - **38,5 m**

usable height - **10 m**

usable area - **3 600 m²**

total load-bearing capacity of the roof structure for hanging - **45 tons**
(1,5 to 13 tons per span)

Upon permission, up to **12 m** of the hall space height can be used in certain spots.

The Hall 4 has five cargo gates distributed along the hall.

Gates dimensions:

four gates:

width - **4,6 m**

height - **4,3 m**

fifth special gate:

width - **4,6 m**

height - **5 m**

Capacity:

Maximum number of occupants - **3 600** people, depending on the type of event and decorations as well as equipment in use.

The load capacity of the floor is **6 000 kg / m²**.

The load can be increased by laying additional support elements on the floor.
